

Final Project

Multivariate Time Series Prediction

Project Instructions

- 1) Choose the dataset you want and recommend using the multivariate features.
- 2) Set the problem statement based on the dataset and build the multivariate model using either statistical or machine learning approaches.
- 3) Write the report based on your findings, and the report should be at least 2 pages (more than 2 pages is also welcome).
- 4) Please see the separate file for instructions on report writing.
- 5) Prepare the presentation for the final project. The presentation should be 10 minutes, with 5 minutes for Q&A.
